

Residential Gas Water Heaters

SELECT® POWER DIRECT VENT

The Select Power Direct Vent water heaters have been engineered to maximize efficiency and deliver a greater energy factor (EF).

POWER DIRECT VENT DESIGN

- Combined horizontal and vertical vent runs up to 180 equivalent feet with 4" diameter venting (ABS, PVC, CPVC and polypropylene)
- Two-pipe sealed combustion system uses outside air, eliminating problems caused by insufficient indoor ventilation
- Reduced NOx emissions comply with air quality management district regulations

ENERGY STAR® QUALIFIED

- All models (except GS6 75 YRPDTL) meet the ENERGY STAR® EF requirement and may also qualify for local utility and rebate programs
- Built-in heat traps on the water inlet and outlet reduce the amount of heat lost through piping
- 2-inch thick, "Environmentally-Friendly" foam insulation reduces the amount of heat loss and contributes to overall energy efficiency

SELF-CLEANING DIP TUBE

- Helps reduce lime and sediment buildup and maximizes hot water output. Made from long-lasting PEX cross-linked polymer.

HOT-SURFACE IGNITOR

- More robust and reliable than standing pilot, and reduces energy consumption.

BLUE DIAMOND® GLASS COATING

- Provides superior corrosion resistance compared to the industry-standard glasslining.

USER-FRIENDLY

- State-of-the-art electronic gas control provides more precise temperature control
- LED control light displays operation status and diagnostics information
- Built-in heat traps on the water inlet and outlet reduce the amount of heat lost through piping

ENHANCED-FLOW BRASS DRAIN VALVE

- Our residential water heaters have a solid brass, tamper resistant, enhanced-flow, ball type, drain valve.
- Uses a standard female hose fitting that allows for fast and easy draining during maintenance.
- Designed for easy operation, this valve includes an integral screwdriver slot that features a ¼ turn (open/close) radius, which not only permits full straight-through water flow but also a quick and positive shut off.

CSA CERTIFIED AND ASME RATED T&P RELIEF VALVE

DESIGN-CERTIFIED BY CSA INTERNATIONAL

- Certified at 150 PSI working pressure.
- Certified to ANSI Z21.10.1-CSA 4.1 or ANSI Z21.10.3-CSA 4.3 standards governing storage tank-type water heaters

AVAILABLE IN NATURAL GAS AND PROPANE

6-YEAR LIMITED TANK AND PARTS WARRANTY

*Propane model has input of 58,000 BTU/hr.
 When ordering propane (LP), change "Y" to "H" in the model number (example GS6 40 YBPDSL).
 For side connect models, add 'L' to model number, e.g. GPDX 50L.
 Side connections available on YBPDS and YBPDT models.
 Side connections are standard on YRPDTL models.
 Natural gas models cited are series 200/210. Propane models are series 201/211.
 All models rated for installation at altitudes up to 10,100 ft.
 †GS6 75 YRPDTL is not ENERGY STAR® qualified.
